

Cariboo Rose Resources Commences Drilling at Lightning Strike Gold-Silver Project

Vancouver, British Columbia – October 21st, 2025 – *Cariboo Rose Resources Ltd.* (“**Cariboo Rose**” or the “**Company**”) (TSX-V: CRB) is pleased to announce that diamond drilling has commenced at its **100%-owned Lightning Strike Gold-Silver Property**, located in the Cariboo region of British Columbia, approximately **65 kilometres northeast of the community of 100 Mile House**.

Gold and gold-silver mineralization at Lightning Strike occurs within **black phyllites of Upper Triassic age (shale)**. Significant drill intercepts reported to date include:

- **0.77 g/t gold over 54.0 metres**
- **3.42 g/t gold and 228.1 g/t silver over 5.0 metres**
- **2.88 g/t gold over 24.0 metres**
- **8.84 g/t gold over 7.5 metres**

Historical work at Lightning Strike was first conducted by **Homestake Mining Corp.** in 1986, and later by **Skygold Resources Ltd.** (now *Spanish Mountain Gold Corp.*) between 2008 and 2010. These programs outlined a broad zone of gold and silver mineralization within the western portion of the current Lightning Strike claim block.

The **association of silver with gold in shale-hosted mineralization** is unusual; however, individual drill samples from recent Cariboo Rose drilling have returned up to **72.8 g/t silver**, while earlier Spanish Mountain Gold drilling reported values as high as **705.0 g/t silver**. In addition to being an important accessory product, **silver serves as a valuable pathfinder element**, providing a vector toward higher-grade gold mineralization.

Shale-hosted gold deposits represent one of the most attractive models for large-scale gold systems globally, with world-class analogues including the **Muruntau** and **Sukhoi Log** deposits in Russia.

In **January 2025**, Cariboo Rose successfully negotiated an **option to acquire a 100% interest** in a contiguous group of claims encompassing the original Homestake discovery area and several well-mineralized drill intercepts (see *Cariboo Rose news release dated February 6, 2025*). The **Lightning Strike Project** now covers **4,193 hectares** in total.

Cariboo Rose currently holds **seven mineral projects in British Columbia**, including Lightning Strike.

Qualified Person

J.W. (Bill) Morton, P.Geo., Director and President of *Cariboo Rose Resources Ltd.*, is the Qualified Person as defined by National Instrument 43-101 and has reviewed and approved the technical information contained in this news release.
