First Phase Diamond Drilling and Airborne Geophysical Survey Completed at Cowtrail

Vancouver, BC – July 6th, 2026 – BRS Resources Ltd. (TSX-V: BRS) and Cariboo Rose Resources Ltd. (TSX-V: CRB) announce the completion of the first phase of diamond drilling and completion of an airborne geophysical survey at the Cowtrail Copper-Gold Porphyry Project in south-central British Columbia.

Cowtrail is a **4,717-hectare copper-gold project** contiguous with the Woodjam and Redgold copper-gold porphyry projects owned by Vizsla Copper Corp. (TSX-V: VCU). It is located 20 kilometers southeast of the operating Mount Polley Mine (copper gold) owned by Imperial Metals Corporation and shares many geological attributes with this deposit.

Four drill holes totaling 1,293 meters were completed with the final hole, CT26-28, being extended past its target depth of 250 meters to 559 meters following the observation of visual mineralization in drill core. The drill string has been left in place. Core processing, sampling and assay will be completed as fast as possible with an expectation of results in six to eight weeks.

In late May Precision GeoSuveys of Langley BC completed a helicopter-borne high resolution aeromagnetic, radiometric, and VLF survey over a core area of the property. The geophysical signature indicated over the current primary area of interest, Lea Lake, consists of a central magnetic low (possibly indicative of hydrothermal destruction of magnetite) coincident with a potassium radiometric high. Similar untested features are indicated in other areas by the survey.

Beginning in 2022 Cowtrail has been under option to BRS Resources Ltd. who may earn a **60% interest** by completing **\$2,000,000 in exploration expenditures**, making **\$200,000 in cash payments**, and issuing shares equivalent to **\$200,000** by **December 19, 2028**.

J.W. (Bill) Morton, P.Geo., a Director of Cariboo Rose Resources Ltd. and a Qualified Person under National Instrument 43-101, has reviewed and approved the technical content of this release.
